

RESISTANCE INDUCTOR ORGANIC-MINERAL FERTILIZER

Organic-mineral fertilizer NP 3-30 in suspension

COMPOSITION (%w/w)

Total nitrogen (N)	3%
Organic nitrogen (N)	0.3%
Ureic nitrogen (N)	2.7%
Phosphoric anhydride (P2O5) total	30%
Water-and neutral ammonium citrate soluble phosphoric anhydride (P2O5)	30%
Organic biological Carbon (C)	6%

ALMAQ is a formulation that induces plants to develop endogenous defense mechanisms, making them more resistant to biotic and abiotic stresses. Due to the presence of nitrogen and phosphorous, the product prevents and cares nutritional deficiencies and reinforces the tissues which will be more resistant to physical and mechanical stress agents. In addition, the content of specific plant extracts stimulate the plants to produce phytoalessine, which are natural endogenous substances that create unfavorable conditions to fungine and bacteria development. The formulation is particularly recommended for vine crops.

DOSAGE AND METHODS OF USE	CROPS	APPLICATION	DOSE
FOLIAR	Fruit/Vine Horticultural Floricultural Industrial	2-4 Throughout the cycle	150-200 ml/100 L of water
FERTIGATION	Fruit/Vine Horticultural Floricultural Industrial	2-4 Throughout the cycle	5-7 l/ha

Warnings: Shake the product well before use. For any mixtures with other products, make preliminary tests. Observe the dosages shown. The product is not combustible and is stable at ordinary temperatures and pressures. Store the product in adequately ventilated rooms at temperatures between +5 ° C and +35 ° C.
