PH METER

REFERENCE LH1001

Laboratory PH meter to check the acidity levels of water and its temperature instantly.

It is a perfect instrument for checking the acidity of water after cleaning and sanitizing water dispensers.

It is extraordinarily effective when it comes to checking the acidity of the water and its temperature, offering very high performance and immediate values when measuring through its digital display.

It can freeze the measurement values so as not to lose them and measure the temperature making automatic compensation. It also incorporates the necessary regulators to carry out the calibration of the device when it is necessary and in an incredibly simple way.

This high quality PH meter fulfills all European requirements and markings.

Note: The meter already comes with a standard calibration, just turn it on and use it.

PH METER

REFERENCE LH1001

Technical Specifications

Measuring range	0-14.00 PH
Resolution	0.1 PH
Accuracy	+/- 0.1 PH
Temperature	0-50°C
Calibration	4.01; 7.00; 10.01
Measurements	188 mm x 38 mm
Weight	82 gr.
Battery	4 x 1.5V (AG13)
